PROFESSIONAL SUMMARY

Data Analyst with hands-on project experience in SQL, Excel, Power BI, and Python for data analysis, KPI reporting, dashboard development, and business insights. Experienced in analyzing customer and sales data, identifying trends and risk factors, performing EDA, and translating findings into actionable recommendations. Hands-on exposure to GenAI tools including ChatGPT and Microsoft Copilot for analytical problem-solving, research, productivity, and workflow support, with a strong foundation in SQL querying, data visualization, statistical analysis, and predictive modeling.

TECHNICAL SKILLS

Data Analysis: Python, SQL, Pandas, NumPy, Data Cleaning, EDA, Statistical Analysis, Risk Factor Analysis
BI & Reporting: Power BI, Excel, Power Query, KPI Reporting, Dashboard Development, Data Visualization
Machine Learning: Scikit-learn, Logistic Regression, Decision Tree, Random Forest
GenAI & Tools: ChatGPT, Microsoft Copilot, Git, GitHub, Streamlit

PROJECTS

Customer Behaviour Analysis | Python, SQL, Power BI

- Cleaned and analyzed customer data using Python, Pandas, and NumPy; performed EDA to identify customer, product, and purchasing patterns.
- Used SQL and Power BI to analyze customer segments, product performance, delivery performance, and discount impact; developed an interactive dashboard and business presentation to communicate findings and recommendations; identified that customers aged 25–35 contributed 40% of revenue and repeat customers had a 2× higher purchase rate.

Amazon Sales Analysis | MySQL, Power BI

- Analyzed sales data using MySQL across customers, products, categories, and time periods; used ROW_NUMBER(), RANK(), and window functions for Top-N analysis, rankings, monthly trends, and running revenue totals.
- Developed an interactive Power BI dashboard to visualize sales KPIs, monthly trends, product/category performance, and customer insights.

Customer Churn Prediction | Python, Scikit-learn, Streamlit

- Cleaned and explored customer data, performed feature engineering, and evaluated Logistic Regression, Decision Tree, and Random Forest models; Logistic Regression achieved 75.305% accuracy.
- Identified customer churn risk factors, including month-to-month contracts, high monthly charges, and low tenure; deployed the selected Logistic Regression model using Streamlit for real-time churn-risk prediction.

EDUCATION

Master of Computer Applications (MCA) — Maharshi Dayanand University | *2026 – Present*
Bachelor of Computer Applications (BCA) — J.B. Knowledge Park, Maharshi Dayanand University | 2023–2026
CGPA: 8.3/10

CERTIFICATIONS

Data Science Certification – Techstack Academy
Advanced Diploma in Computer Applications (ADCA)
